## Architectural Precast Specialists

---

### Job Description

Job Title: Construction Factory Manager - Production

Wage Details: £ Negotiable

Hours: 7.30AM – 5PM

Duration: Permanent

Location: Taunton, SOMERSET

Are you a motivated and charismatic leader? Do you have experience in one or more of the following fields:

- Construction management or engineering
- Production or Project management
- Pre-cast or in-situ concrete works

As our business success continues we are looking to strengthen our senior management team. We are looking for a well-rounded individual with a broad background in construction to take responsibility for the management and operation of our pre-cast manufacturing facility. The daily issues associated with managing people, safety, logistics and finance are very similar to those faced on modern construction sites.

You will be heading up an experienced and committed production team and providing strategic guidance and leadership. This will include motivation of the workforce, working to tight programmes and budgets, responsibility for safety, driving efficiency and undertaking a series of modernisation works. Specific training and experience relating to our products will be gained during employment, however, an ability to read technical drawings and a broad understanding of engineering principles will be vital.

We would expect the right candidate to have the following skills/experience:

- Good knowledge of general building and construction, understanding of engineering principles, technical design & build processes.
- Track record of working on successful construction projects as a site/package/project manager
- Knowledge of precast, stone or facades in general is beneficial.
- Fastidious approach to safety.
- All necessary IT skills are taken as a given, knowledge of MS Project is beneficial.

Primary functions will include:

- Managing the day-to-day issues of the production facility, ensuring people and systems are in place and robustly operated, programming works, managing logistics, dealing with construction related challenges.
- Ensuring safety is prioritised at all times and pre-empting risks associated with precast production.

- Providing strategic leadership and determining how best to invest in facilities and equipment.
- Assisting and supporting the production team in overcoming technical challenges.
- Working with QS to submitting monthly applications and maximise recovery of variations.

#### About us

Sterling Services Ltd specialises in the production of architectural precast concrete cladding and natural stone, concentrating in high quality bespoke projects requiring a high degree of skill and knowledge. Through our partnering and close relationships with developers, architects and main contractors we ensure that projects benefit from the off site prefabrication process. Sterling Services Ltd is a part of the Garenne Construction Group who operate a range of construction related businesses in the UK and Channel Islands. Opportunities exist for the right candidate across the Group.
