

# Sterling Services

Architectural Precast Specialists

Job Vacancy

## About the Vacancy

Job Title:	Structural Engineer
Wage Details:	£ Negotiable
Hours:	8AM – 5PM
Duration:	Permanent
Location:	Solihull or Reading

As our business success continues, we are looking to strengthen our technical team to assist with the design of bespoke precast and stone facades for our projects from inception through to delivery.

We are a specialist sub-contracting business with contracts across the south of the UK and offices in Birmingham, Reading and Taunton. Candidate can be based in any region and will be expected to travel to our various projects and our factory as required. Typically we are working on between 6-12 projects at any one time and are a growing business. As part of a larger construction group we are able to draw on wider skills, experience and resource.

Exceptional opportunities exist across the Group for the right candidate.

### Primary functions will include:

- Delivery of economical façade designs on programme.
- Technical responsibility for structural engineering design
- Generate and review calculations and drawings
- Supervision and technical development of junior Engineers
- Coordinating design with others

### We would expect the right candidate to have the following skills/experience:

- Degree-qualified Civil/Structural Engineer / Chartered Civil/Structural Engineer
- Proven track record in design delivery with specific experience of; steel, reinforced concrete, masonry and timber designs from concept to detailed delivery, foundation design and structural analysis.
- Detailed working knowledge of design codes and standards relating to structural engineering
- Knowledge of construction implementation with proven site experience and an understanding of buildability.
- Proven track record in delivering technically excellent design projects on time and to budget
